

NBSINFRA

Empower, Enhance, Protect: NBSINFRA Paving the Way for Resilient Urban Futures

Funded by
the European Union

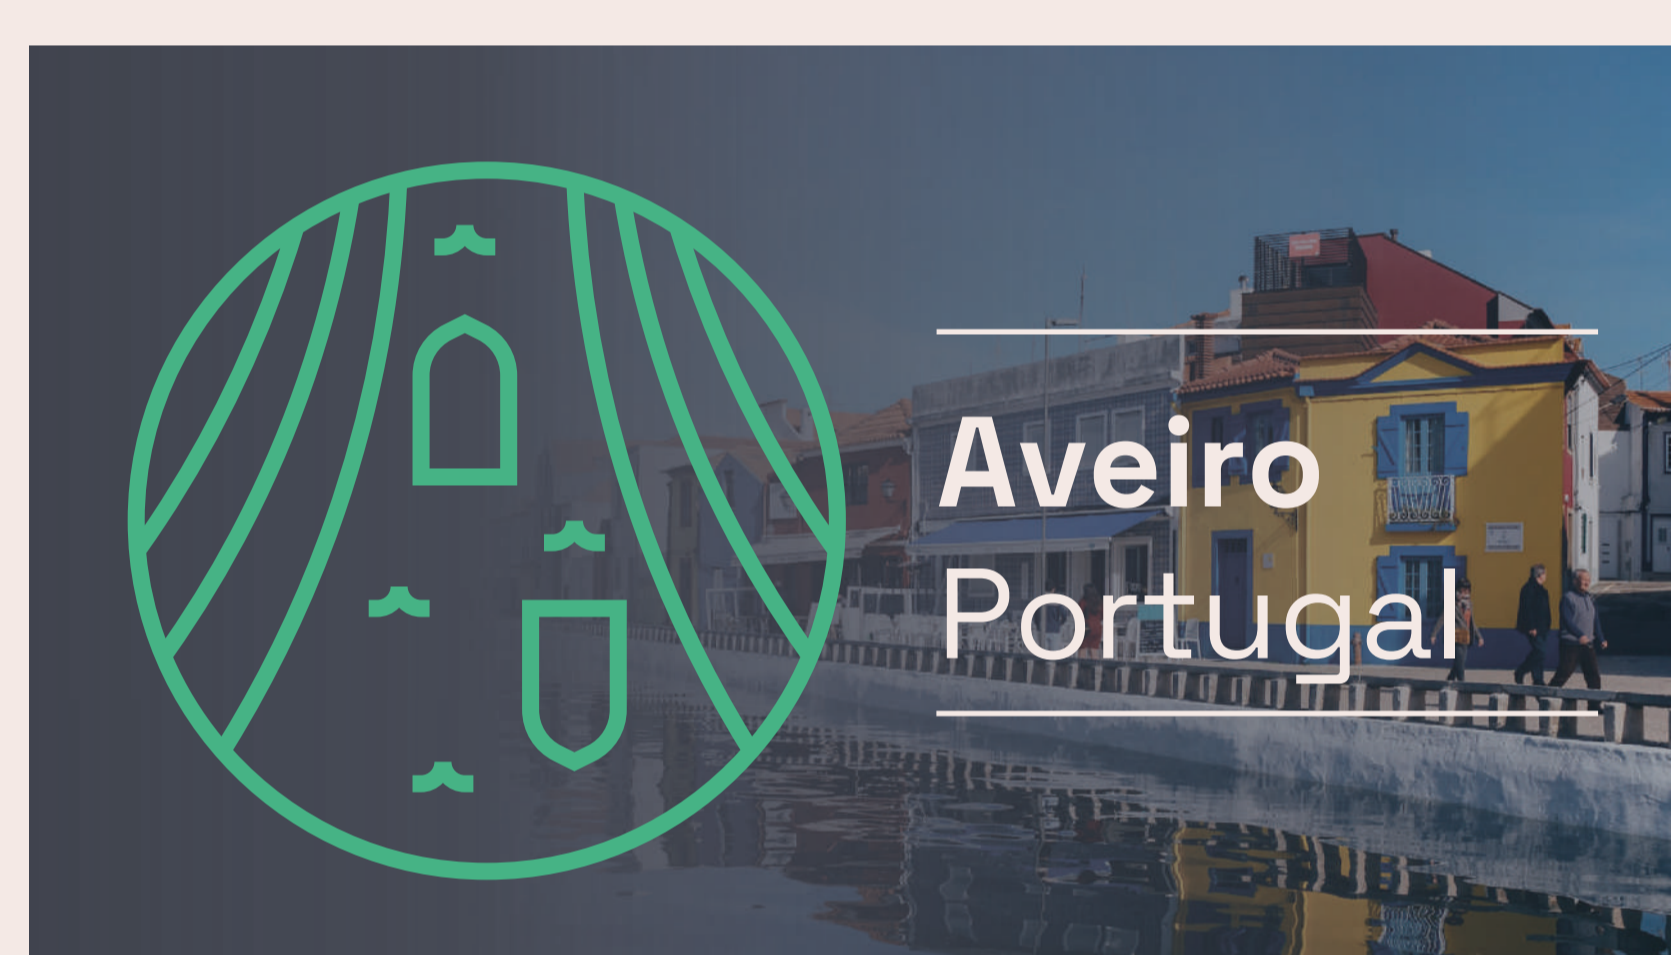

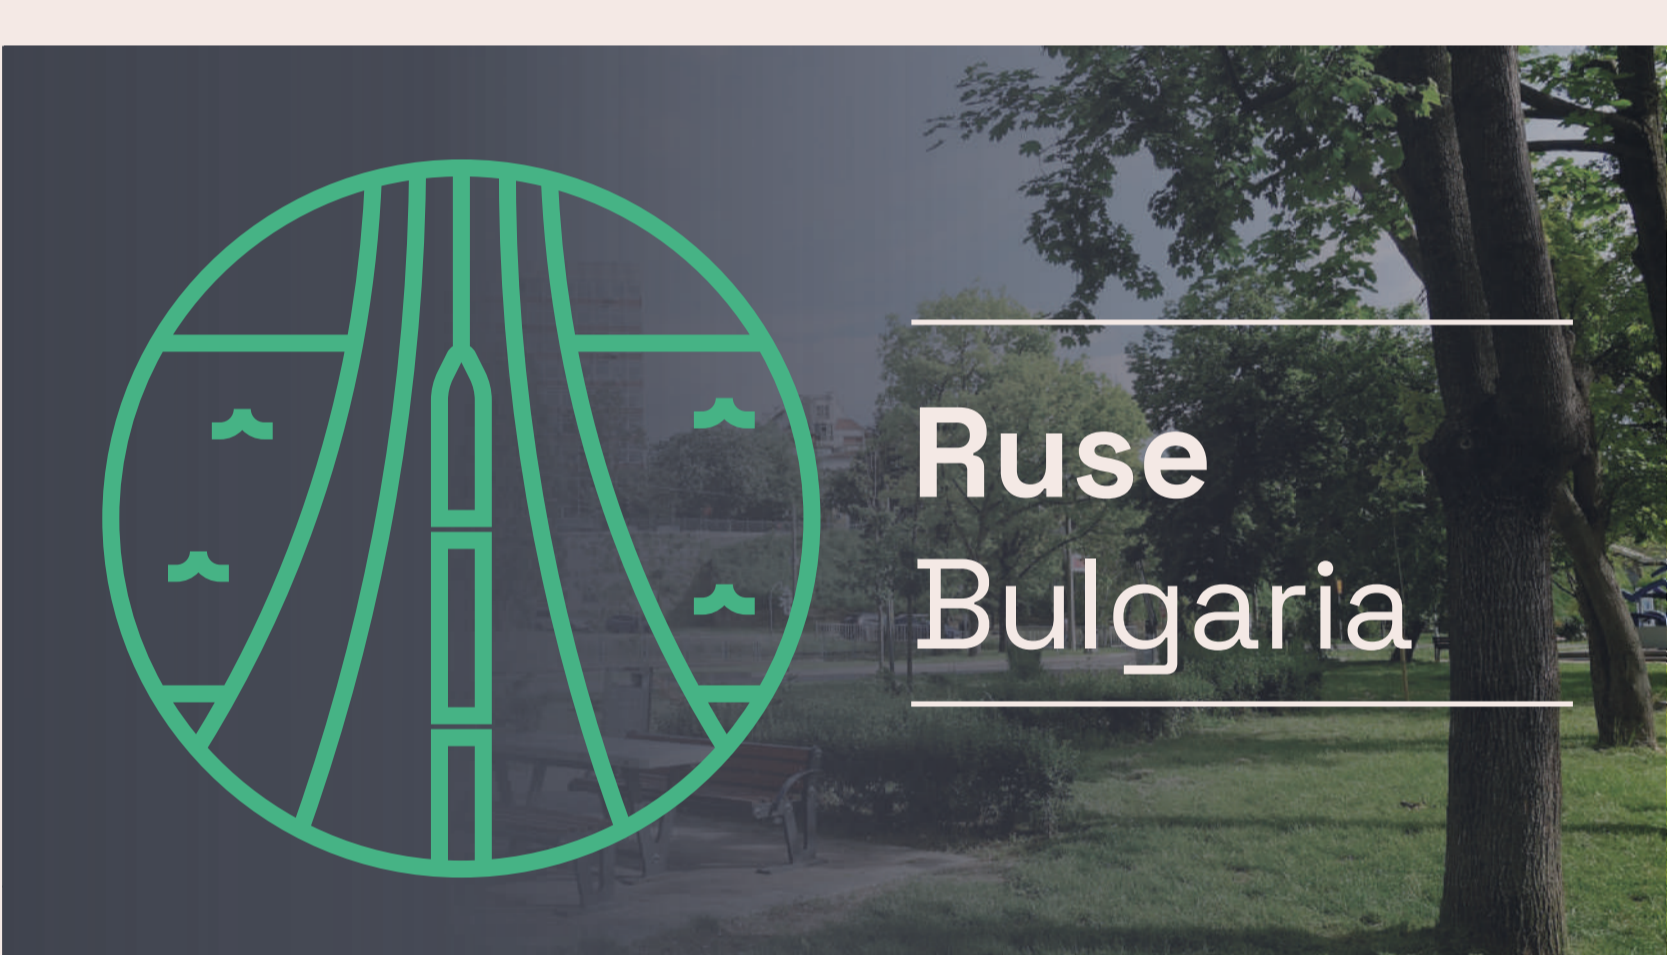

NBSINFRA is an innovative EU-funded project, with a primary focus on promoting nature-based solutions (NBS) to protect crucial urban infrastructure from natural and human-induced hazards.

It is committed to validating the effectiveness of NBS, pioneering new hazard response methodologies, empowering communities with developmental toolkits, disseminating best practices across the EU, and highlighting the social acceptability and affordability of NBS.

City Labs

NBSINFRA will evaluate the cost-effectiveness of NBS in the protection of local infrastructure through 5 City Labs. The City Labs work as collaborative, real life testing environments, aim to maximize impact by prioritizing solutions that are owned and co-created by residents, end-users, managers, and civil society.
